

OREGON CLEAN ENERGY FUNDING OPPORTUNITIES

Funding Opportunities for Multifamily Affordable Housing Providers

Home Energy Rebates

Oregon's Home Energy Rebate programs, while likely not available until late 2025/early 2026, will provide funding to single family and multifamily households to make necessary energy efficiency improvements and install highly efficient electric appliances and equipment. The Home Energy Rebate program includes:

- Up to \$14,000 per household/unit through the **Home Electrification and Appliance Rebate** program for electric heat pumps, electric service and wiring upgrades, weatherization measures, and more.
 - Rebates for energy savings through the **Home Efficiency Rebate** program:
 - 20-34% energy savings - \$8,000 rebate per household/unit
 - 35%+ energy savings - \$10,000 rebate per household/unit
- *rebate amounts are for households/units at or below 80% AMI

Solar for All

Oregon's [Solar for All program](#) will provide point of sale rebates for multifamily buildings and will support the deployment of community solar projects across the state that serve low-income households. Like most states, Oregon's solar program will launch in the fall of 2025.

Oregon will also be served by several [multistate and Tribal solar programs](#).

In addition to Oregon's Home Energy Rebates and Solar for All funding, affordable housing providers may be able to leverage state-administered grants, rebates, and other low-cost financing to support energy-saving projects. Current programs include:

- The Solar + Storage Rebate Program which provides funding for low- and moderate-income serving solar projects.

Get a Head Start: How to Prepare Your Portfolio to Leverage Clean Energy Incentives

While Oregon's Home Energy Rebates and Solar for All programs are still being finalized, there are steps you can take now to ensure your properties are ready to access funding once programs launch.

Assess Your Portfolio's Needs

- ✓ Lower operating costs
- ✓ Deferred maintenance or needed capital improvements
- ✓ Must complete upgrades to comply with building code or qualify for tax credits
- ✓ Building owner/developer preservation goals

Complete Energy Audits and Assessments

- ✓ Make sure you are benchmarking your properties' energy usage. It is important to collect data on owner-paid and tenant-paid utilities. *Many programs will require participants to demonstrate energy savings post-retrofit work through energy benchmarking.*
- ✓ Identify opportunities to improve the energy efficiency of units and common areas. Comprehensive audits and energy assessments should align with an AHSRAE Level II audit. *Some programs may provide incentives to help cover the costs of energy audits.*
- ✓ When applicable, consider assessments that outline a pathway for achieving net zero emissions. This includes:
 - Full electrification
 - Elimination of on-site carbon emissions
 - Power from onsite or offsite renewable energy/clean energy sources

Stay in the loop with your state's programs
